
EDUCATION

College

Bachelor of Science in Information Technology

Major in Business Analytics

Batangas State University – The National Engineering University ARASOF–Nasugbu

2022 - 2026

Senior High School

Science, Technology, Engineering, and Mathematics (STEM) Strand

Panatalan Senior High School

2020 – 2022

Junior High School

Dr. Francisco L. Calingasan Memorial Colleges Foundation and Incorporated

2016 – 2020

TECHNICAL SKILLS

- Design tools: Figma, Canva
- Programming: PHP, JavaScript, HTML, CSS, Python, Tailwind, Laravel, React
- Developmental tools: VS Code, Git Hub
- Database tools: My SQL, PostgreSQL

PROJECTS

Internship Project:

WRESS: Web-Based Requirements Engineering Support System for DOST-Advanced Science and Technology Institute

Software Engineer | 2026

A draft web-based platform designed to centralize requirements engineering activities across multiple organizations and projects. It supports requirements documentation, tracking, validation, management, reporting, and workflow organization for software development projects.

Capstone Project:

ReadBee: A Teacher-Assisted Reading Assessment Tool with Voice-Based Read Rate Monitoring and Comprehension Analysis

Project Leader, UI/UX Designer, & Web Developer | 2025

A comprehensive reading assessment platform designed to help educators track student reading progress with detailed analytics and reporting tools. The system includes voiced-based read rate monitoring and comprehension analysis capabilities.

Institutional Project:

LiveliHub: A Web-Based Facility Management and Activity Portfolio System for the Taal Building – Livelihood Training Center

UI/UX Designer & Web Developer | 2026

A web-based platform for managing event reservations and facilities at the Taal Building, Batangas State University – ARASOF Nasugbu. The system allows users to book facilities, track event schedules, and manage reservations efficiently through an intuitive interface.

Other Academic Projects:

- **MoneyPulse: Online Banking System**

Web Developer | 2025

A web-based online banking platform that enables users to manage accounts, perform transactions, and view balances securely.

- **PawCheck: Pet Health Management System**

Project Leader and UI/UX Designer | 2025

A comprehensive pet health management system that helps pet owners and veterinarians track health records, schedule appointments, and manage pet information through QR codes.

Other Academic Projects:

- **Divertex Call Center Information and Management System**

Project Leader, *UI/UX Designer & Web Developer* | 2024

A web-based system designed to manage call center operations, monitor agent performance, and track customer interactions. The platform provides an intuitive interface for supervisors and staff, managing records, and generating performance reports.

- **AJL Enterprise Service & Repair Management System**

Project Leader, *UI/UX Designer & Web Developer* | 2024

A web-based platform for managing appliance repair requests and other related services. The system allows users to submit service requests, track repair status, and manage client records, while providing administrators with an intuitive interface to schedule tasks and monitor service operations efficiently.

Stand Alone Java Application Projects

- **Curriculum Adviser System**

Solo Developer | 2024

A standalone Java application designed to assist educators in planning and managing curriculum schedules. The system enables users to input, organise, and retrieve curriculum data, helping streamline academic planning and decision-making.

- **Finedining Ordering System**

Solo Developer | 2023

A standalone Java application for managing orders in a fine dining restaurant. The system allows staff to create, and update customer orders, providing an efficient workflow for order management without the need for internet connectivity.

CERTIFICATIONS

- **Certification of Completion - On the Job Training**

Department of Science and Technology–Advanced Science and Technology Institute (DOST-ASTI)

Issued: May 2026

- **Information Technology Specialist – Data Analytics**

Batangas State University The National Engineering University ARASOF – Nasugbu

Issued: May 2025

SKILLS

- | | | |
|-----------------------|-------------------|-------------|
| • Leadership | • UI/UX Design | • Designing |
| • Analytical Thinking | • Web Development | |
